Stay in touch wherever you are

New Zealand is made up of three islands surrounded by a lot of water, so it's little wonder that we have a proud boating tradition. It's been our primary playground for as long as we can remember. We combined our passion for the water and our engineering, electrical and design knowledge to launch Pacific Aerials in 1977. We've been crafting the world's best marine antennas and accessories ever since.

When you're on the water, a crucial tool to help you communicate with other vessels and land, and stay safe, is your marine antenna. These may not be seen as a sexy purchase – although ours are definitely the world's best looking models – it's the one purchase you should never skimp on. With Pacific Aerials' antennas, it's the innovative technology that's on the inside that sets us apart from the rest. All our knowledge and experience is wrapped up in every one of our antennas to ensure you have reliable communications that go the distance.

All our antennas and accessories are designed, engineered, manufactured and individually tuned and tested in Auckland, New Zealand, where we have some of the harshest marine and weather conditions in the world. We have never outsourced any of our work or used inferior componentry, and never will. That's because lives are on the line. Hundreds of thousands of boaties around the globe have confidence in our products and rely on us to stay in touch with their world. You can too. When you buy Pacific Aerials' antennas you know you're in safe hands.

We're world leaders thanks to our:

- Innovative, stylish, unique design
- Quality, durable materials
- Reliable, advanced technologies
- Sophisticated construction
- Rigorous individual testing.

Pacific Aerials The Facts

Established: 1977

Core expertise: Design and manufacture of communications antennas and accessories.

Philosophy: Always innovate, listen to our customers and be uncompromising on delivering the best antennas and accessories available. We're agile and will build antennas and accessories to fit our customers' markets and conditions.

Proud Innovation: Our Pro series marine antenna range, featuring an easy-to-remove and remount fibreglass antenna without pulling or cutting the coaxial cable.

Why us? We're the best, period. We are innovative, reliable and offer real value. Every product that leaves our factory is individually tuned and tested to ensure it works right first time and will continue to work.

Sales: Worldwide; customers serviced by us and our distributors.

Certification: ISO 9001: since 1994.
Ensures quality engineering with every product.

VHF Antennas

Seamaster Mastmount

VHF Antennas

Our Mastmount antennas are robust halfwaves. They are the number one choice for an installation where the lowest possible windage is a requirement.

Designed to be installed with our cablepacks which makes installation a breeze.

- P6001** VHF 1.0m ABS housing / stainless steel whip complete with S0239 and mounting bracket.
- P6185** VHF 1.0m tapered fibreglass / nylon base. Complete with 30cm flylead and stainless steel bracket.
- P6012** 10m cablepack.
- P6013** 15m cablepack.
- P6014** 20m cablepack.
- P6015** 25m cablepack.
- P6016** 30m cablepack.

P1217

CABLEPACK

P6001

P6185

These antennas are hard-wired with cable for boaties who don't have a need to remove their antenna. They are available in a range of heights, and are generally halfwave in design with 3dBi gain. These antennas are rugged and durable offering outstanding performance.

- P6004** 2.5m VHF - Ultraglass.
- P6003** 1.8m VHF - Ultraglass.
- P6035** 1.0m VHF - Ultraglass.
- P6091** 1.0m VHF with 4m cable and built in base.
- P6087** 0.6m quarterwave - nylon flexi.

Use these antennas with either:
P6006, P6007, P6080, P6067, P7105.

Use these mounts with any Seamaster Classic range antennas.

VHF Antennas

VHF Antennas

"No Cable" antennas for boaties who may want to remove the antenna from its base. Made from Ultraglass and glass filled nylon these antennas are rugged and durable, offering outstanding performance, halfwave design, 3dBi gain. Available in 2.5m, 1.8m + 1.0m

- P6102** 2.5m VHF - Ultraglass.
- P6101** 1.8m VHF - Ultraglass.
- P6184** 1.0m VHF - Ultraglass with P6115 mount/bracket.
- P6182** 1.0m VHF Ultraglass.
- P6106** 0.45m VHF Heliflex for RIBs + tenders.

Use these antennas with Seamaster Pro bases: P6168, P6113, P6115, P6111 complete with 5m of cable.

P6106 P6182 P6184 P6101 P6102

P6168

P6113

P6115

P6111

Use these mounts with any Seamaster VHF Pro antennas.

VHF Antennas

Longreach Classic Range

VHF Antennas

P6053

P6059

P6051

P6503

P6504

This range offers elegance and excellence. A high gain, high performing antenna with glossy stylish looks. These antennas offer up to 6 dBi gain and will outperform all others in its class. Made from Ultraglass and stainless steel ferrules these antennas will last for years. Halfwave or colinear in design, built for ruggedness and durability for customers who demand the best. All antennas are hardwired with 5m cable.

P6051 VHF - Colinear, 6dBi, 2.5m.

P6059 VHF - Halfwave, 3dBi, 2.5m.

P6053 VHF - Halfwave, 3dBi, 1.8m.

P6503 VHF - Colinear, 6dBi, 4.9m.

P6504 VHF - Colinear, 6dBi, 7.3m.

Use these antennas with either:
P6078, P6079, P6071, P9055.

P6078

P6079

P6071

P9055

Use these mounts with any Longreach antenna.

Use with Longreach Classic P6503, P6504

VHF Antennas

VHF Antennas

Longreach Pro antennas are the "no cable" removal option for boaties who may want to remove and refit their antennas as required. Made in Ultraglass with stainless steel ferrules these antennas are slim and chic offering up to 6dBi gain. The Longreach Pro range will not disappoint. Halfwave or colinear in design, these antennas are rugged and durable and will go the distance.

- P6121** 1.8m - Halfwave, Ultraglass, 3dBi.
- P6122** 2.5m - Colinear, Ultraglass, 6dBi.
- P6123** 2.5m - Halfwave, Ultraglass, 3dBi.

Use these antennas with Longreach Pro bases: P6151, P6159, P6166 complete with 5m of cable.

P6121

P6123

P6122

Use with Longreach Pro antennas.

VHF Antennas

Deepsea
Commercial

VHF Antennas

P6025

P6029

Heavy duty antennas designed for commercial vessels and coastal stations. The first choice for those who earn their living on the water. Constructed in an industrial grade Ultraglass with stainless steel sleeve and recessed N-type socket.

P6025 1.5m - halfwave, 3dBi.

P6029 2.5m - colinear, 6dBi.

Install with P3253 stainless steel U Bolts.

P3253

VHF Antennas

Seamaster Auxilliary

VHF Antennas

Seamaster Emergency VHF antenna.

P6031 VHF emergency antenna in a stowage pack. The telescopic whip extends to become a full-performance marine VHF halfwave antenna. Comes complete with velcro straps, 5m cable and a selection of connectors to suit most VHF radios.

Seamaster Band Splitter

P7101 VHF-AM/FM broadcast band splitter with VHF and car radio plugs fitted. The P7101 splitter uses the VHF antenna to provide AM/FM reception without degrading or interfering with the performance of the antenna at VHF marine frequencies.

For Portable Marine VHF Radios

P6081 VHF flexible antenna with either BNC, TNC or SMA connector.

P6082 VHF telescopic antenna with either BNC, TNC or SMA connector.

P6031

P6081

P6082

P7101

P6005 **P6105** **P6205** **P6305**

AIS is a marine tracking system used for identifying and locating vessels by electronically exchanging data with nearby ships. The AIS unit uses a standardised transceiver to broadcast position, speed, name, course and destination of vessels. The frequency used to transmit this data is higher than marine VHF, therefore using a standard marine antenna may compromise the performance of the AIS. It is our recommendation that you use a dedicated AIS antenna to ensure maximum performance and safety.

- P6005** 1.0m - Masthead antenna.
Use with cable pack (Pg5).
- P6105** 1.8m - Seamaster Pro, 3dBi.
Use Seamaster Pro mount.
- P6205** 2.5m - Longreach Pro, 3dBi.
Use Longreach Pro mount.
- P6305** 2.5m - Deepsea, 3dBi.
Use with P3253.

P6168 **P6111** **P6113** **P6151** **P6159** **P6166** **P3253**

Use these mounts with any Seamaster range antennas.

Use with Longreach Pro antennas.

Use with Deepsea commercial antennas.

Quad Band

Pacific Aerials' range of Quadband cellular antennas are designed to give outstanding coverage and performance across all cellular bands. If you change your provider there is no need to change your antenna. Covers cellular bands: 800-900-1800/1900-2100MHz.

P6401 1.0m - Ultraglass.
Use Pro Mount.

P6402 1.8m - Ultraglass.
Use Pro Mount.

P6403 2.5m - Ultraglass.
Use Pro Mount.

P6404 2.5m - Deepsea Ultraglass.
Use with P3253.

P6159

P6166

P3253

Use with Longreach Pro antennas.

Use with Deepsea commercial antennas.

Longreach HF/SSB

VHF Antennas

P6149

P6501

P6502

HF/SSB antennas require a high standard of installation to work correctly. The antenna is connected to an antenna tuner via a high voltage insulator. It's extremely important that the mounting system will radiate effectively. We recommend using the longest antenna possible and consult an experienced HF radio installer if you have any doubts about the installation.

P6501 4.9m - two section
- Ultraglass.

P6502 7.3m - three section
- Ultraglass.

Mount with P9055 - swivel mount and support bracket. We recommend mounting the nylon support bracket 900mm from the base. Can be side or deck mounted.

P6149 DSC Watch antenna. 2.5m ultraglass. Stainless steel ferrule. Use with Longreach Pro mount.

P9055

P6151

P6159

Use with Longreach Pro antennas

The black range

Longreach Black antennas

Longreach now in black.

Chic and glossy – our black Longreach antennas will add a touch of class to any boat.

Available for VHF - AM/FM. If you would like a black antenna for another frequency, talk to us.

VHF

P6124 Longreach Pro Black
- Colinear - 2.5m.

P6125 Longreach Pro Black
- Halfwave - 1.8m.

AM/FM

P6145 Longreach Pro - 2.5m.

P6146 Longreach Pro - 1.8m.

Use these antennas with Pro Series black nylon or stainless steel mounts complete with black cable and fastfit jack:
P6151B, P6154B, P6159B, P6158B.

P6046

P6092

The classic range of AM/FM antennas are hardwired with 5m of cable and fitted with a car radio plug. Ideal for boaties who don't have a need to remove their antennas. Available in 1m or 1.8m lengths. These antennas are rugged and durable providing great reception of AM/FM at sea.

P6092 1.0m - Complete with its own tip down mounting system and 5m of cable. P7105 nylon bracket optional.

P6046 1.8m Ultraglass with 5m cable. Mount on P6006, P6007 or P6067, P6080.

P6006

P6007

P6067

P6080

P7105

Use these mounts with any Seamaster Classic range antenna.

AM/FM

Seamaster Pro Range

AM/FM

Designed to last, these antennas are robust and reliable providing outstanding reception for years. The "No cable" design allows boaties to remove and refit the antenna as required. Height matters so choose the longest antenna possible.

- P6104** 2.5m - Ultraglass.
- P6103** 1.8m - Ultraglass.
- P6183** 1.0m - Ultraglass.
- P6107** 450mm - Heliflex.

P6107

P6183

P6103

P6104

P6169

P6118

P6116

P6114

Use these mounts with any Seamaster Pro AM/FM antenna.

The "No Cable" option for those who need to remove and refit their antennas as required. Made in an Ultraglass radome with stainless steel ferrule - these antennas are slim and stylish and will provide you with excellent AM/FM coverage out at sea. Mount your antenna as high as possible to give a clear all round view.

P6141 1.8m Ultraglass.

P6142 2.5m Ultraglass.

P6141

P6142

P6154

P6158

P6167

Use these mounts with any AM/FM Pro antenna range.

TV Antenna

OmniPro

TV Antennas

Marine terrestrial TV antennas have to be omni-directional because a boat under way or swinging at anchor is constantly changing its bearing to the transmitter.

Pacific Aerials' amplified antenna will make the most of a weak signal but will not magically create one, if there is no signal.

Stay in touch wherever you are

When you're travelling on the road, one crucial tool to keep you connected is your land mobile and/or cellular antenna. It might not be in your face, but the difference between average antennas and the best antennas, such as ours, is that you will be heard when you need to be heard.

Whilst your vehicle's antenna isn't seen as a sexy purchase – although ours are definitely the world's best looking models – it's the one purchase you should never skimp on, because you rely on your communications going the distance.

Pacific Aerials' antennas are developed expressly for the off-road environment, so we build them tough, to handle all conditions. But it's the technology that's on the inside that counts, and sets us apart from everybody else. We combined our engineering, electrical and design knowledge and launched Pacific Aerials in 1977. We've been crafting the world's best land mobile and cellular antennas and accessories ever since.

All our antennas and accessories are designed, engineered, manufactured and individually tuned and tested in Auckland, New Zealand. We have never outsourced any of our work or used inferior componentry, and never will. That's because lives are on the line. Hundreds of thousands of customers around the globe have confidence in our products and rely on us to stay in touch with their world. You can too. When you buy Pacific Aerials' antennas you know you're in safe hands.

We're world leaders thanks to our:

- Innovative, stylish, unique design
- Quality, durable materials
- Reliable, advanced technologies
- Sophisticated construction
- Rigorous individual testing.

CB UHFCB

CB in NZ is 26.5MHz, so a full wavelength antenna would be a bit more than 11 metres long. That's obviously a little long to attach to your bumper, so people tend to use antennas that are a fraction of the wavelength: 1/2w, 5/8w, 1/4w are all common wavelengths for antennas. UHFCB is commonly known as 477MHz or PRS.

- P1003** 26.5MHz - Helical fibreglass antenna. 1.2m black. Pre tuned.
- P6088b** 26.5MHz – Black helical. Flexi with 5m cable and a P1680 mount.
- P6088nz** 26.5MHz – White helical. Flexi with 5m cable and a P1681 mount.
- P6089** Whip only for 26.5MHz. Mount on P1681.
- P1558** UHFCB – 477MHz – 1/2 wave Flexi. Hard wired with 5m cable.
- P1636** Longhaul colinear, elevated feed, 477MHz. Hard wired with 5m cable.

CB UHFCB

CB UHFCB Antennas

Use these with P6089, P1003

VHF Antennas

Longhaul
138-174MHz

VHF Antennas

Very high frequency (VHF) covers the frequency range from 30 MHz to 300 MHz. Frequencies immediately below VHF are denoted high frequency (HF), and the next band of higher frequencies are known as ultra high frequency (UHF).

VHF is the first band at which wavelengths are small enough to make efficient transmitting antennas for vehicles and handheld devices.

- P1017** 1/4w tapered stainless steel antenna. 1250mm 66-88MHz
- P9038** 1/4w tapered stainless steel antenna. 935mm 88-118MHz
- P1019** 1/4w tapered stainless steel antenna. 550mm 138-174MHz
- P9066** 1/4w flexi black antenna. 138-174MHz
- P1013** 5/8w fibreglass and stainless steel antenna. 138-174MHz

P1017 P1013 P1019 P9066 P9038

Use these with Longhaul Antennas.

VHF Antennas

Longhaul Pro

VHF Antennas

Pacific's Longhaul Pro antennas are an innovative range offering superb electrical performance, easy installation, and rugged components, all at a very affordable price. Covering VHF frequencies, these Longhaul antennas can be interchanged on the Longhaul pro mounts.

- P1653** 1/2w stainless steel antenna
– 150-156MHz.
- P1654** 1/2w stainless steel antenna
– 138-146MHz.
- P1655** 1/2w stainless steel antenna
– 162-174MHz.

Use these antennas with either:
P1611, P1612 or P1615.

Use with these brackets:
P1082, P2023, P2029, P1103.

Use these with Longhaul pro mounts.

UHF Antennas

Longhaul
400 MHz - 420 MHz

UHF Antennas

P9067 P1072T P3156 P1006T P2201

These are the trusted original Pacific designs, from back in the days when only Maxwell Smart had a cell phone and the rest of the world communicated via two way radio.

These antennas require a ground plane.

P9067 1/4 w flexi antenna - Black.

Use with P1680, P1681, P1682.

P1072T 5/8w stainless steel antenna.

P3156 Colinear stainless steel antenna.

P1006T Colinear flexi antenna.

P2201 Low profile antenna.

Use these antennas with either:

P1096, P1680, P1681, P1682, P1024,

P9962, P2068, P2069, P2070, P1506,

P1509, P1082, P2023.

P1096 P1680 P1681 P1682 P1024 P9962 P2068 P2069

Use these with Longhaul antennas.

UHF Antennas

Longhaul Pro 400 MHz - 420 MHz

UHF Antennas

Pacific's Longhaul Pro antennas are an innovative range offering superb electrical performance, easy installation, and rugged components. Covering all UHF frequencies, all at a very affordable price. Longhaul antennas can be interchanged on the Longhaul pro mounts. For example, if a higher gain is required you can change a halfwave for a colinear.

- P1621** 1/2w flexi antenna.
- P1631** Colinear stainless steel antenna, elevated feed.
- P1641** 1/4w antenna, elevated feed – 400-470MHz.

Use these antennas with either:
P1611, P1612, P1615, P1505, P1614, P1618.

Use with these brackets:
P1082, P2029, P1103, P2023,
P2024, P1613.

Cellular

These antennas require a groundplane.

P4000 Stainless steel colinear
- 800MHz.

P4006 Stainless steel colinear
- 900MHz.

Mount these antennas using a collet
- P1096 and a base:

P1680, P1681, P1682, P1024, P9962.

Brackets: P2023, P1082, P2029.

P2204 Low profile - 800MH.

P2205 Low profile - 900MHz.

Use these with Longhaul antennas.

These antennas are ground plane independent.

- P1624** 1/2w black nylon flexi
- 800MHz.
- P1634** 1/2w stainless steel/elevated
feed - 800MHz.
- P1637** Colinear/flexi elevated feed
- 800MHz.
- P1625** 1/2w black nylon flexi
- 900MHz.
- P1635** 1/2w stainless steel/elevated
feed - 900MHz.
- P1638** Colinear/flexi elevated feed
- 900MHz.

Use these antennas with either:
P1611, P1612, P1613, P1615, P1614,
P1618, P1505.

Use with these brackets:
P1082, P2029, P1103, P2023.

Use these with Longhaul Pro antennas.

Quadband

800 - 900-1800/1900-
2100 MHz Quadband

Quadband

P1572

P1573

Our Quadband antennas have been designed to deliver outstanding performance across all cellular bands in the toughest environments.

- Ground plane independent.
- Rugged and durable "Ultraglass."
- Pro style, simple plug and play.

P1573 1m fibreglass antenna on stainless steel spring hardwired with 5m of coax and FME jack.

P1572 1m fibreglass antenna.

P1611

P1612

P1615

P1505

P1614

P1618

Use these with Longhaul Pro antennas.

DC-DC Converters

Pacific's range of DC-DC converters are designed to run 12V communications equipment in 24V environments. Small and lightweight they make installation a breeze.

P5027 10amp.

P5027m 10amp - with memory.

P5028 20amp.

Micromounts

138-900MHz

Micromounts

P7031, P7042, P7043, P7044

As the name suggests, a small mount requiring an 8mm hole for installation. Ideal for boot or roof mounting.

The micromount range covers UHF, VHF and cellular bands.

These antennas are also used for metering applications in the water, power and effluent industries.

Requires a ground plane.

P7031 5m RG58/au with FME jack.

P7042 2m RG58/au with FME jack.

P7043 0.5m RG174/au with FME jack.

P7044 3m RG174/au with FME jack.

P7051 Magmount with 3m RG174/au and FME jack.

P7011 Lip bracket.

P7012 L bracket.

P7051

P7011

P7012

Micromounts

- P7020** 5/8w stainless steel
400-420MHz.
- P7021** 5/8w stainless steel
450-520MHz.
- P7022** Colinear stainless steel
800MHz.
- P7032** 1/4w stainless steel
400MHz-960MHz.
- P7033** Colinear stainless steel
470-520MHz.
- P7034** Colinear stainless steel
900MHz.
- P7036** Colinear stainless steel
400-420MHz.
- P7037** Colinear stainless steel
450-470MHz.
- P7038** 1/4w stainless steel
138-174MHz.

138-900MHz

Micromounts

Longhaul Pro mounts

- P1611** Antenna mount with 5m RG58AU coax and Fastfit jack.
- P1612** Antenna roofmount with 5m RG58AU coax and Fastfit jack.
- P1618** MagMount with 5m RG58AU coax and Fastfit jack.
- P1615** Antenna mount with 0.5m RG174 coax and Fastfit jack.
- P1614** MagMount with 3m RG174AU coax and Fastfit jack.
- P1505** Lip bracket and antenna mount with 5m RG58AU coax and Fastfit jack.
- P1508** Lip bracket and antenna mount with 0.5m RG174AU coax and Fastfit jack.

Longhaul antenna mounts

- P1680** Small antenna mount (use with collet P1096 for stainless steel antennas).
- P1681** Small antenna mount with 5m RG58AU coax (use with collet P1096 for stainless steel antennas).
- P1682** Small antenna mount with 0.5m RG174AU coax (use with collet P1096 for stainless steel antennas).
- P2068** Spring mount for Longhaul antennas.
- P2069** Spring mount for Longhaul antennas with 5m RG58AU coax and Fastfit jack.
- P2070** Spring mount for Longhaul antennas with 0.5m RG174AU coax and Fastfit jack.
- P1024** MagMount 85mm with 3m RG174AU coax and Fastfit jack. Use P1096 collet for stainless steel antennas.
- P9962** MagMount 85mm with 5m RG58AU coax and Fastfit jack. Use P1096 collet for stainless steel antennas.
- P1506** Lip bracket and small mount with 5m RG58AU coax and Fastfit jack.
- P1509** Lip bracket and small mount with 0.5m RG174AU coax and Fastfit jack.
